

Sustainable Coating Solutions

FleetSpec[™]

Fleet Finishes

A complete line of next-generation primers and topcoats created specifically for the needs of today's professional finishers.

"I've never been more excited about a paint company and their paint products."

*Terry Reed, Paint Department Manager
The American Road Machinery Company*

Take Control of Your Paint Operation

FleetSpectm Fleet Finishes

FleetSpecTM features multiple premium polyurethane binders engineered to meet the specific production and performance requirements of your application.

SUPERIOR DURABILITY AND LONG-TERM PERFORMANCE

FleetSpecTM incorporates cutting edge zinc-fortified primers with advanced polyurethane technology to provide superior finish & weathering.

HIGHLY ADAPTABLE AND EASY TO APPLY

FleetSpec offers several systems, each uniquely designed to meet the parameters of your current finishing process and application. This provides for improved turnaround times and ease of use.

SUPPORTED BY PROFESSIONALS AND PROUDLY MADE IN THE USA

FleetSpec is manufactured at our ISO 9001 registered facility in Angola, IN and supported by a team of veteran technical specialists located throughout North America. We are here to ensure your success.

FleetSpec™ is supported by our proprietary ColorLinks™ pigment formula lookup system, providing access to thousands of fleet and OEM colors from anywhere in the world.

Baril Coatings has spared no expense in developing one of the fleet industry's most advanced, fully integrated color intermix systems. FleetSpec toners offer the color range and performance required to meet the needs of today's refinish and OEM markets. Our tint system was established using the latest color matching technology and rigorous QC tolerance levels equal to the very best automotive systems. Tighter tolerances mean better matches for our customers, saving time and money.

ColorLinks™ Color Retrieval System:

- Easy to use web-based color formula look-up software
- Color match from your computer, tablet or mobile phone.
- Colors are mixed, reduced and activated by weight. No more guessing.
- Simple and effective data delivery on VOC & technical information
- Thousands of colors and associated variances

Primers

	Description	Application	Flash Time
FleetSpec™ DCZ	Zinc-Rich Urethane Primer	Highly corrosion resistant zinc-rich primer designed for maximum performance in extreme environments.	30-45 Mins
FleetSpec™ 850	Zinc Fortified Multi-surface Primer	Suitable for use on steel, aluminum and other surfaces. Provides excellent coverage, protection and adhesion.	10-15 mins or 30-45 minutes
