COMMITMENT

Baril Coatings provides final and sustainable solutions for steel protection, industrial product finishing and marine applications. We strive to bring a new dimension to the coatings industry through our commitment to increasing production efficiencies and lowering overall application costs for our customers. We accomplish this through relentless product innovation that reduces cure times, eliminates the need for heat and minimizes waste. Baril's line of high performance protective coatings combine high efficiency and ease of application with industry leading protection and anti-corrosion characteristics.

PROCESS

To meet the ever-changing demands of our customers, Baril Coatings operates out of multiple facilities around the United States. Each of our locations specializes in the production and distribution of low VOC, high performance coatings. Strategically located, these plants and facilities allow us to quickly deliver any quantity required at a high level of consistency and quality. Our state of the art ColorLinks™ pigmentation platform allows us to match and process any color in can for all single component and 2K coatings quickly and accurately.

Baril Advantages

- Excellent Color/Gloss Retention
- Superior Adhesion
- Flexibility
- Dry to touch: 30 Minutes, Dry to Handle: 1-hour
- Excellent Chemical Resistance
- Up to 9,600 hrs. Salt Spray Corrosion Resistance
- Exceptional Abrasion and Scratch Resistance
- High Chip Resistance

TECHNICAL SERVICE & SUPPORT

Offering industry leading technical support, our team of veteran coating professionals is highly experienced in all aspects of OEM and refinish application. We rely on decades of experience in working alongside our clients to engineer the most optimal solutions available to meet their goals. In addition to coating system design, we provide pre-treatment recommendations, equipment consultation and maintenance. Our customer fulfillment team is dedicated to maintaining full transparency and understands that our clients operate their production lines and paint schedules based on the information they receive from their suppliers. We strive to fulfill orders as quickly as possible while providing order updates at key points throughout the delivery process.
